E-Learning Collaboration

Proskills Global – E-Learning Management and Administration

Proskills Global will manage and administer the E-Learning services delivered through the Health & Safety Click platform, ensuring a seamless experience for your organisation. Our responsibilities include:

- **Client Access:** Providing secure access to the database portal, fully integrated into the Proskills Global website.
- **Platform Administration:** Managing the platform, including customer registration, learner setup, course allocation, and ongoing user management.

Learner Enrolment: Setting up learners on the system, enrolling them in the appropriate training courses, and issuing user rights for appointed personnel within Proskills Global Limited – E-Learning Management and Administration

Proskills Global will manage and administer the E-Learning services delivered through the Health & Safety Click platform, ensuring a seamless experience for your organisation. Our responsibilities include:

- **Client Access:** Providing secure access to the database portal, fully integrated into the Proskills Global website.
- **Platform Administration:** Managing the platform, including customer registration, learner setup, course allocation, and ongoing user management.
- **Learner Enrolment:** Setting up learners on the system, enrolling them in the appropriate training courses, and issuing user rights for appointed personnel within a business.
- **Account Oversight:** Monitoring and managing customer accounts using the integrated management and reporting system.
- **Invoicing:** Issuing invoices for course purchases and training services provided.
- **Customer Support:** Acting as the primary point of contact for clients regarding course access, enrolment, and general account administration.

With Proskills Global managing your E-Learning programme, you can focus on your core operations while we deliver a hassle-free solution that simplifies training administration, strengthens compliance management, and supports the ongoing development of your workforce.

E-Learning Collaboration

Accident Reporting

Workplace accidents can occur at any time, but effective accident reporting plays a vital role in improving safety and reducing risks. Suitable for all employees, this essential module provides the knowledge needed to manage workplace accidents confidently and correctly.

The course explains what incidents should be reported and why reporting is important. It also covers the requirements of the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 2013 (RIDDOR), including which incidents – both on and off site – must be reported to the Health and Safety Executive (HSE) or the relevant local authority.

Learners will gain an understanding of their legal responsibilities, how to minimise the likelihood of workplace accidents, and the correct procedures for investigating and documenting incidents when they occur. The Accident Reporting eLearning Course uses straightforward language to explain the purpose of accident reporting, its value to an organisation, and the key information that should be included in an accident report.

Like all our courses, the training is divided into two sections: an interactive learning module followed by a multiple-choice assessment designed to test understanding of the material covered. Upon successful completion of the assessment, learners will receive a downloadable and printable certificate.

Accident Reporting: Key Features:

- Understand the purpose and legal requirements of RIDDOR
- Identify the different types of incidents and reports required
- Clear, concise and easy to follow content
- Quality assured by RoSPA / CPD accredited and certificated
- NOS compliant, quality assured and accredited by Proskills Global
- Downloadable and printable certificate upon successful completion

E-Learning Collaboration

Asbestos Awareness

Build a solid foundation in Asbestos Awareness with this comprehensive training course, designed to help staff recognise asbestos-related hazards and remain compliant with current legislation.

Our Asbestos Awareness eLearning Course provides the essential knowledge needed to work safely around asbestos in the workplace. The course covers your legal responsibilities, the health effects of asbestos exposure, common locations where asbestos may be found, warning signs to look out for, who is most at risk, and the correct procedures for managing asbestos safely at work.

Like all our courses, the training is divided into two sections: an interactive learning module followed by a multiple-choice assessment to test your understanding. On successful completion of the assessment, learners can download and print their certificate.

Asbestos Awareness: Key Features:

- Understand appropriate control measures, emergency procedures and legal responsibilities
- Supports compliance with the Control of Asbestos Regulations 2012
- Covers asbestos hazards, risk management and workplace compliance requirements
- Clear, concise and easy to follow content
- Quality assured by RoSPA / CPD accredited with certification
- NOS compliant, quality assured & accredited by Proskills Global
- Downloadable and printable certificate upon successful completion

E-Learning Collaboration

Chemical Safety in the Workplace

Our Chemical eLearning Course provides essential training on working safely with chemicals and hazardous substances in the workplace. It equips employees with the knowledge required to handle chemicals safely and carry out tasks in line with current health and safety regulations.

The course covers the different types of hazardous substances, associated risks, and employer and employee responsibilities under the Control of Substances Hazardous to Health (COSHH) Regulations. Learners will also gain an understanding of how to complete a COSHH risk assessment and implement suitable control measures.

The training is divided into two sections: an interactive learning module followed by a multiple-choice assessment designed to test understanding of the course content. Upon successful completion, learners can download and print their certificate instantly.

Chemical Safety in the Workplace: Key Features

- Fully aligned with the Control of Substances Hazardous to Health (COSHH) Regulations 2002
- Designed to help employees identify hazardous substances and apply appropriate safety measures
- Clear, concise and easy to follow learning content
- Quality assured by RoSPA / CPD accredited with certification
- NOS compliant, quality assured & accredited by Proskills Global
- Downloadable and printable certificate upon successful completion

E-Learning Collaboration

Confined Spaces

This module is designed for anyone who works in confined spaces or areas with poor ventilation. It covers the risks associated with this type of work and the critical safety measures that can help prevent serious incidents.

Our Confined Spaces E-Learning course provides the knowledge needed to understand the legislation surrounding confined space work, the hierarchy of control, safe systems of work (SSoW), and how these principles are applied in real working environments.

By successfully completing the course, learners will gain a clear understanding of what defines a confined space, how to identify the key hazards involved, and the importance of implementing appropriate control measures. Topics covered include:

- Hazards associated with confined space work
- The meaning of “specific risk” in relation to confined space entry and activities
- The framework for safe systems of work in confined spaces

Like all our courses, the programme is divided into two sections: an interactive learning module followed by a multiple-choice assessment to test understanding. Upon successful completion of the assessment, learners will receive downloadable and printable certification.

Confined Spaces: Key Features

- Essential for anyone working in confined space for any length of time
- Clear, concise and easy to follow content
- Quality assured by RoSPA / CPD accredited with certification
- NOS compliant, quality assured & accredited by Proskills Global
- Downloadable and printable certificate upon successful completion

E-Learning Collaboration

DSE Display Screen Equipment

Our Display Screen Equipment (DSE) course provides a clear understanding of the risks associated with improper use of display screen equipment, along with the potential impact on both employees and employers.

By the end of the course, learners will understand how to reduce these risks through correct workstation setup and safe working practices, whether working in the office or remotely.

Like all of our courses, the training is divided into two sections: an interactive learning module followed by a multiple-choice assessment designed to test knowledge and understanding. Upon successful completion, learners will receive a downloadable and printable certificate.

DSE: Key Features

- Explains what DSE is, why DSE training is important, and the health risks linked to incorrect use
- Demonstrates how to set up a workstation correctly to support safe, comfortable, and efficient working
- Clear, concise, and easy-to-follow content
- Quality assured by RoSPA and CPD accredited and certificated
- NOS compliant, quality assured, and accredited by Proskills Global
- Downloadable and printable certification upon successful completion

E-Learning Collaboration

Electrical Safety

Electrical safety is everyone's responsibility, not just that of electricians. This training module is designed to help all employees understand the importance of electrical safety in the workplace and how to work safely around electrical equipment.

Our Electrical Safety eLearning Course covers the key principles of electrical safety, including how electricity works, its common workplace applications, and the legislation governing its safe use. Learners will gain an understanding of electrical hazards, the faults that can lead to accidents, and the control measures required to minimise risk, prevent harm, and maintain compliance.

The course is divided into two sections: an interactive learning module followed by a multiple-choice assessment to test understanding. On successful completion, learners will receive a downloadable and printable certificate.

Electrical Safety: Key Features

- Suitable and relevant to staff of every level
- Designed in compliance with The Electricity at Work Regulations 1989 and The Management of Health and Safety at Work Regulations 1999
- Clear, concise and easy to follow content
- Quality assured by RoSPA / CPD accredited and certificated
- NOS compliant, quality assured and accredited by Proskills Global
- Downloadable and printable certification upon successful completion

E-Learning Collaboration

Fire Safety

Meet your legal obligation to provide Fire Awareness training with our fast, practical, and engaging Fire Safety module.

Designed for all workplace environments, this Fire Safety eLearning course gives learners a clear understanding of employers' legal responsibilities, fire prevention measures, and the correct actions to take in the event of a fire.

Like all our courses, the programme is divided into two sections: an interactive learning module followed by a multiple-choice assessment to test understanding. Learners who successfully complete the assessment receive a downloadable and printable certificate.

Fire Safety: Key Features

- Supports compliance with The Fire Safety Order 2005 and The Health and Safety at Work Act 1974
- Clear, concise and user-friendly content
- Quality assured by RoSPA / CPD accredited and certificated
- NOS compliant, quality assured and accredited by Proskills Global
- Downloadable and printable certification upon successful completion

E-Learning Collaboration

Food Hygiene Level 2

Ensure your business meets food safety regulations with our Food Hygiene Level 2 course. Designed for anyone involved in handling or preparing food, this course covers essential food hygiene practices, legal responsibilities, and effective methods for preventing foodborne illnesses.

Like all of our courses, it includes an interactive learning module followed by a multiple-choice assessment to test your knowledge. Upon successful completion, learners will receive a downloadable and printable certificate.

Food Hygiene Level 2: Key Features

- Meets UK food safety training requirements, including HACCP principles
- Simple, clear and easy to understand content
- CPD accredited and certification included
- Downloadable and printable certification awarded on completion

E-Learning Collaboration

Health and Safety Law

Gain a clear understanding of Health & Safety legislation and how it is applied in the workplace with this informative e-learning course.

Our Health and Safety Law course is designed to explain the legal responsibilities of employers, the role of Common and Civil Law in workplace safety, and the ways Health & Safety legislation is enforced.

Like all of our courses, it is divided into two sections: an interactive learning module followed by a multiple-choice assessment to test your understanding. Successful completion of the assessment provides learners with a downloadable and printable certificate.

Health and Safety Law: Key Features

- Designed to give an overview of the Health & Safety legal framework
- Helps staff at every level develop a broad understanding of Health & Safety Law
- Clear, concise and easy to follow content
- Quality Assured by RoSPA / CPD accredited and certificated
- NOS compliant, quality assured & accredited by Proskills Global
- Downloadable and printable certification awarded on completion

E-Learning Collaboration

Health and Safety Management

Learn how to implement an effective and robust Health and Safety Management system in place with this comprehensive training module.

Our **Health and Safety Management eLearning Course** is designed to provide a clear understanding of the legal requirements for Health & Safety Management along with the legal duties placed on businesses and organisations.

By the end of the course, learners will understand the processes involved in effective Health & Safety management, as well as the benefits and positive impact it can have within the workplace.

As with all of our courses, the training is divided into two sections: an interactive learning module followed by a multiple-choice assessment to test your knowledge. Successful completion of the assessment provides learners with a downloadable and printable certificate.

Health and Safety Management: Key Features

- Explains the principles of effective Health & Safety management
- Highlights the impact of good Health & Safety management
- Clear, concise and easy to follow content
- Quality assured by RoSPA and CPD accredited with certification included
- NOS compliant, quality assured and accredited by Proskills Global
- Downloadable and printable certification awarded on completion

E-Learning Collaboration

Managing First Aid in the Workplace

Accidents and medical emergencies can happen at any time, so it is essential that employees understand how to respond quickly and appropriately in the workplace.

The Managing First Aid eLearning Course has been developed to provide learners with a clear understanding of workplace First Aid legislation, legal responsibilities, and the requirements organisations must meet to ensure effective First Aid provision.

The course is structured in two stages: an interactive learning module followed by a multiple-choice assessment designed to test learner understanding. Upon successful completion, learners receive a downloadable and printable certificate.

Managing First Aid: Key Features

- Suitable for employees, supervisors, and managers at all levels
- Provides practical awareness of how to respond during workplace emergencies
- Clear, engaging, and easy-to-follow learning content
- Quality assured by RoSPA and CPD accredited
- Mapped to National Occupational Standards (NOS)
- Quality assured and accredited by Proskills Global
- Downloadable and printable certification upon completion

E-Learning Collaboration

Manual Handling

Meet your legal obligations and help ensure employees carry out manual handling activities safely and effectively with our comprehensive Manual Handling eLearning Course.

Designed particularly for supervisors, team leaders, and managers, this course provides essential knowledge on safely lifting, carrying, and moving loads within the workplace while supporting compliance with current Manual Handling legislation.

The course is structured into two simple stages:

- An interactive learning module covering key principles and safe working practices
- A multiple-choice assessment to confirm learner understanding

Upon successful completion, learners receive a downloadable and printable certificate.

Manual Handling: Key Features

- Suitable for employees at all levels, with particular focus on supervisors and managers
- Supports compliance with the Manual Handling Operations Regulations 1992
- Clear, practical, and easy-to-follow course content
- Quality assured by RoSPA
- CPD accredited and certificated
- National Occupational Standards (NOS) compliant
- Quality assured and accredited by Proskills Global
- Instant downloadable and printable certification upon completion

E-Learning Collaboration

Manual Handling for Operatives

Ensure your organisation meets its legal obligations and helps employees carry out manual handling activities safely and effectively with our Manual Handling for Operatives eLearning Course.

This course provides learners with the essential knowledge required to safely lift, carry, move, and handle loads within the workplace, helping to reduce the risk of injury and improve workplace safety standards.

Like all our eLearning programmes, the course is divided into two sections:

- An interactive learning module
- A multiple-choice assessment designed to test learner understanding

Upon successful completion of the assessment, learners receive a downloadable and printable certificate.

Manual Handling for Operatives: Key Features

- Suitable for employees at all levels across a wide range of industries
- Supports compliance with the Manual Handling Operations Regulations 1992
- Practical, engaging, and easy-to-understand course content
- Clear and user-friendly learning experience
- Quality assured by RoSPA
- CPD accredited and certificated
- Aligned to National Occupational Standards (NOS)
- Quality assured and accredited by Proskills Global
- Downloadable and printable certification upon completion

E-Learning Collaboration

Noise Awareness

Excessive noise exposure in the workplace can lead to serious and long-term health issues. This Workplace Noise eLearning course helps learners understand who may be at risk, the dangers associated with noise exposure, and the practical measures that can be taken to reduce those risks.

The course provides a clear understanding of what workplace noise is, where it is commonly encountered, the impact it can have on hearing and overall wellbeing, and the control measures required to minimise exposure and maintain compliance.

Like all our eLearning programmes, the course is divided into two sections:

- An interactive learning module
- A multiple-choice assessment to test learner understanding

Upon successful completion of the assessment, learners receive a downloadable and printable certificate.

Workplace Noise Awareness: Key Features

- Designed in line with The Control of Noise at Work Regulations
- Simple, engaging, and easy-to-follow content
- Quality assured by RoSPA
- CPD accredited and certificated
- Aligned to National Occupational Standards (NOS)
- Quality assured and accredited by Proskills Global
- Downloadable and printable certification upon completion

E-Learning Collaboration

Office Safety

Promote a safer and healthier working environment with our Office Safety eLearning course. Developed specifically for office-based employees, this course helps learners recognise and manage common workplace hazards, including slips, trips and falls, fire safety procedures, and safe Display Screen Equipment (DSE) practices. It also provides an overview of essential health and safety responsibilities in line with UK legislation.

Like all our eLearning programmes, the course includes an interactive learning module followed by a multiple-choice assessment to test knowledge and understanding. Upon successful completion, learners will receive a downloadable and printable certificate.

Office Safety: Key Features

- Simple, clear and user-friendly content
- CPD accredited and certificated
- Downloadable and printable certification upon completion

E-Learning Collaboration

Risk Assessment

Effective risk assessment plays a critical role in protecting people, preventing incidents, and maintaining strong workplace health and safety standards. Understanding how to identify hazards, evaluate risks, and implement appropriate control measures is essential for every organisation.

Our Risk Assessment eLearning Course provides learners with a clear understanding of:

- What a risk assessment is
- Why risk assessments are carried out
- Employer and employee responsibilities
- The legal duties and compliance requirements associated with workplace risk assessment

The course is structured in two parts:

1. An interactive learning module designed to build knowledge and understanding
2. A multiple-choice assessment to confirm learner competence and understanding

Upon successful completion, learners receive a downloadable and printable certificate.

Risk Assessment: Key Features

- Suitable for employees and managers at all levels
- Covers the core principles of effective risk assessment
- Designed for use across a wide range of industries and working environments
- Clear, practical, and easy-to-follow content
- Quality assured by RoSPA
- CPD accredited and certificated
- Aligned to National Occupational Standards (NOS)
- Quality assured and accredited by Proskills Global
- Downloadable and printable certification included

E-Learning Collaboration

Slips, Trips and Falls

Reduce workplace accidents and improve safety awareness with our fast, accessible Slips, Trips and Falls eLearning course.

This course is designed to help learners understand how slip, trip, and fall incidents occur in the workplace, identify common hazards, and apply practical measures to minimise risks and improve safety standards.

The training is divided into two sections: an interactive learning module followed by a multiple-choice assessment to test knowledge and understanding. Upon successful completion, learners receive a downloadable and printable certificate.

Slips Trips and Falls: Key Features

- Suitable for employees, supervisors, and managers at all levels
- Developed in line with the Health and Safety at Work Act and Workplace Health regulations
- Clear, engaging, and easy-to-follow content
- Quality assured by RoSPA and CPD accredited
- Aligned to National Occupational Standards (NOS)
- Quality assured and accredited by Proskills Global
- Includes downloadable and printable certification upon completion

E-Learning Collaboration

Working at Height

Falls from height remain one of the leading causes of workplace fatalities and serious injuries each year. This essential Working at Height E-Learning Course has been developed to help learners understand the risks associated with working at height and how to minimise the potential for accidents and injury.

The course provides a comprehensive overview of:

- What constitutes working at height
- Common hazards and risk factors
- Safe working practices and control measures
- Relevant legislation and compliance requirements

Structured for ease of learning, the course is divided into two key stages:

1. An interactive learning module
2. A multiple-choice assessment to confirm understanding

Upon successful completion of the assessment, learners will receive a downloadable and printable certificate.

Working at Height: Key Features

- Developed in line with current legislation and industry standards
- Suitable for a wide range of industries and working environments
- Clear, practical, and easy-to-follow content
- CPD accredited and RoSPA approved
- Aligned to National Occupational Standards (NOS)
- Quality assured and accredited by Proskills Global
- Instant downloadable and printable certification available upon completion

E-Learning Collaboration

Workplace Equipment

The Workplace Equipment eLearning course provides learners with the essential knowledge required to use workplace equipment safely while maintaining compliance with PUWER (Provision and Use of Work Equipment Regulations) legislation.

This course helps employees understand the various hazards associated with workplace equipment and explains the legal responsibilities surrounding its safe use. Learners will also gain an understanding of the control measures and safe working practices needed to minimise risk and promote a safer working environment.

The programme is divided into two key stages:

- An interactive learning module designed to build knowledge and awareness
- A multiple-choice assessment to confirm understanding of the course content

Upon successful completion of the assessment, learners will receive a downloadable and printable certificate.

Workplace Equipment: Key Features

- Developed in line with current legislation and industry best practice
- Clear, engaging, and easy-to-follow content
- Quality assured by RoSPA
- CPD accredited and certificated
- Aligned to National Occupational Standards (NOS)
- Quality assured and accredited by Proskills Global
- Instant downloadable and printable certification available upon completion

E-Learning Collaboration

Workplace Transport

On-site vehicles can present serious safety risks if not properly controlled. Reduce the likelihood of workplace accidents with this comprehensive training module designed for all employees.

Our Workplace Transport Safety eLearning Course provides an understanding of the different types of workplace transport, the hazards and risks involved, effective control measures, and the legislation governing workplace transport safety.

Like all our courses, it is divided into two sections: an interactive learning module followed by a multiple-choice assessment to test your knowledge. Upon successful completion, learners receive a downloadable and printable certificate.

Workplace Transport: Key Features

- Clear, concise, and easy-to-follow content
- Quality assured by RoSPA / CPD accredited and certificated
- Aligned to National Occupational Standards (NOS)
- Quality assured and accredited by Proskills Global
- Downloadable and printable certification

E-Learning Collaboration

Human Resources Courses

Cyber Awareness

The Cyber Awareness eLearning module is designed to help businesses and individuals understand the core principles of cybersecurity and how to safeguard sensitive information from online threats. If your role involves handling digital data or using online systems, cybersecurity should form a key part of your everyday responsibilities. This course outlines the importance of maintaining cyber security, identifying potential risks, applying best practices for secure data handling, and protecting systems and information from unauthorised access and cyber-attacks.

As with all our courses, the training is divided into two sections: the learning module followed by a multiple-choice assessment to test your understanding of the material covered. Successful completion of the assessment provides learners with a downloadable and printable certificate.

Cyber Awareness – Key Features

- Clear, concise, and easy-to-follow content
- CPD accredited and certificated
- Downloadable and printable certification

E-Learning Collaboration

Difficult Conversations

The Difficult Conversations eLearning module is designed to develop the essential skills needed to manage challenging discussions confidently and professionally. These skills are valuable for managers, leaders, educators, coaches, and individuals involved in workplace investigations, including grievance, disciplinary, or accident-related situations. The course helps strengthen communication, critical thinking, problem-solving, and fact-finding abilities across a variety of professional roles and environments. It also explores practical techniques and provides useful guidance on effective questioning and active listening.

As with all our courses, the training is divided into two sections: the learning module followed by a multiple-choice assessment to test your understanding of the material covered. Successful completion of the assessment provides learners with a downloadable and printable certificate.

Difficult Conversations – Key Features

- Clear, concise, and easy-to-follow content
- CPD accredited and certificated
- Downloadable and printable certification

E-Learning Collaboration

Effective Questioning & Active Listening Skills

The Effective Questioning and Active Listening Skills eLearning module is designed to help individuals develop the communication skills needed to manage conversations confidently and effectively. These skills are valuable for managers, leaders, educators, coaches, and those involved in workplace investigations, such as grievance, disciplinary, or accident-related situations. The course supports the development of communication, critical thinking, problem-solving, and fact-finding skills across a wide range of professional roles and environments. It also explores practical techniques and provides guidance on improving questioning methods and active listening abilities.

As with all our courses, the training is divided into two sections: the learning module followed by a multiple-choice assessment to test your understanding of the material covered. Successful completion of the assessment provides learners with a downloadable and printable certificate.

Effective Questioning – Key Features

- Clear, concise, and easy-to-follow content
- CPD accredited and certificated
- Downloadable and printable certification

E-Learning Collaboration

Managing Absence

Employee absence can have a significant impact on businesses across the UK, affecting productivity, performance, and overall staff morale. Effective absence management helps organisations reduce disruption, improve employee wellbeing, and maintain a motivated workforce. This eLearning course provides an understanding of the different types of absence, effective management procedures, and the legal considerations involved in recording and handling absence within the workplace.

As with all our courses, the training is divided into two sections: the learning module followed by a multiple-choice assessment to test your understanding of the material covered. Successful completion of the assessment provides learners with a downloadable and printable certificate.

Managing Employee Absence - Key Features

- Understanding the different types of absence
- Managing sickness absence policies
- Conducting return-to-work interviews
- Measuring and recording absence effectively
- Understanding data protection and legal responsibilities
- Clear, concise, and easy-to-follow content
- Downloadable and printable certification

E-Learning Collaboration

Managing Stress

Work-related stress remains one of the leading causes of employee absence and lost working days across the UK. Many employees report feeling unsupported when experiencing stress or anxiety at work, highlighting the importance of creating healthier, more supportive working environments.

The Managing Stress eLearning course is designed to help learners understand the causes and effects of workplace stress, recognise early warning signs, and develop practical strategies for managing stress effectively within the workplace.

The course also explores employer responsibilities, health and safety considerations, and the importance of supportive management practices in promoting employee wellbeing.

As with all our courses, the programme is divided into two key sections:

- An engaging learning module designed to build knowledge and awareness
- A multiple-choice assessment to test understanding of the course material

Managing Stress: Key Features

- Understanding stress and work-related stress
- Identifying causes and triggers of workplace stress
- Practical ways to reduce and avoid stress at work
- Health & Safety responsibilities relating to stress management
- Stress policies and the role of line managers
- Effective approaches for dealing with stress
- Legal responsibilities, consequences, and employer obligations
- Successful completion of the assessment provides learners with a downloadable and printable certificate.

E-Learning Collaboration

Mental Health Awareness

Mental health challenges affect a significant number of people each year, yet stigma and misunderstanding still exist within many workplaces. Creating a supportive and inclusive working environment is essential to protecting employee wellbeing, improving engagement, and meeting employer responsibilities under health and safety legislation.

The Managing Mental Health eLearning course is designed to help learners develop a better understanding of mental health, recognise the impact of mental ill health in the workplace, and support positive wellbeing across teams and organisations.

The course explores practical approaches to supporting employees, promoting recovery, and creating a workplace culture where mental health is treated with the same importance as physical health and safety.

As with all our courses, the programme is divided into two key sections:

- An interactive learning module designed to build understanding and awareness
- A multiple-choice assessment to test learner knowledge and comprehension

Managing Mental Health: Key Features

- Understanding mental health and mental wellbeing
- Promoting positive mental health in the workplace
- Mental ill health, recovery, and employee support
- Supporting employees returning to work
- Understanding reasonable adjustments in the workplace
- Managing workplace reactions and colleague support
- Employer responsibilities under Health & Safety legislation
- Successful completion of the assessment provides learners with a downloadable and printable certificate.

E-Learning Collaboration

Modern Slavery

Modern slavery remains a serious issue both within the UK and across the world, affecting individuals in a wide range of industries and working environments. Organisations have an important role to play in recognising, preventing, and reporting potential cases of exploitation.

The Modern Slavery eLearning course is designed to help learners identify the warning signs of modern slavery and understand how it may present within the workplace or supply chain environment.

Suitable for employees at all levels, the course also explains legal responsibilities relating to modern slavery, along with the appropriate actions to take and reporting procedures to follow if concerns arise.

As with all our courses, the programme is divided into two key sections:

- An engaging learning module designed to build awareness and understanding
- A multiple-choice assessment to confirm learner knowledge and comprehension

Successful completion of the assessment provides learners with a downloadable and printable certificate.

Modern Slavery: Key Features

- Recognising the signs and indicators of modern slavery
- Understanding how to help prevent exploitation in the workplace
- Clear, concise, and easy-to-follow learning content
- Guidance on legal responsibilities and reporting procedures
- CPD Accredited and Certificated
- Downloadable and printable certification upon completion

E-Learning Collaboration

Sexual Discrimination

The Sexual Discrimination eLearning course is designed to help learners understand how to recognise, prevent, and challenge unfair treatment in the workplace related to sex or gender.

The course explores workplace equality, discrimination, harassment, and inappropriate behaviour, helping organisations promote a more inclusive, respectful, and legally compliant working environment.

By the end of the programme, learners will have a clearer understanding of the different forms of discrimination and the responsibilities individuals and employers share in creating a fair workplace culture.

As with all our courses, the programme is divided into two key sections:

- An interactive learning module designed to build awareness and understanding
- A multiple-choice assessment to test learner knowledge and comprehension

Successful completion of the assessment provides learners with a downloadable and printable certificate.

Sexual Discrimination: Key Features

- Understanding the difference between direct and indirect discrimination
- Recognising what constitutes sexual harassment in the workplace
- Promoting equality, inclusion, and respectful workplace behaviour
- Clear, concise, and easy-to-follow learning content
- CPD Accredited and Certificated
- Downloadable and printable certification upon completion

E-Learning Collaboration

CPD Certification Status

Continued Professional Development (CPD)

Our CPD certification service provides employees with a recognised record of their ongoing professional development in health and safety and workplace learning.

By enabling CPD certification, organisations can offer staff the opportunity to gain industry-recognised credentials that demonstrate their commitment to maintaining and enhancing their professional knowledge, skills, and competency.

This supports both individual career development and wider organisational commitment to continuous improvement, compliance, and professional standards.

When CPD certification is enabled, Health and Safety Click Ltd will register successful learner completions with the CPD Certification Service and provide access to the relevant certification portal and login details.

What is CPD?

CPD (Continuing Professional Development) is a recognised process of tracking and documenting the learning, training, and development activities individuals undertake throughout their careers.

It provides evidence that employees are actively:

- Maintaining professional competence
- Developing new skills and knowledge
- Enhancing workplace performance
- Keeping up to date with industry standards and legislation
- Demonstrating commitment to professional excellence

CPD Certification Benefits

- Industry-recognised professional development records
- Supports employee progression and competency development
- Enhances organisational training credibility
- Demonstrates commitment to continuous improvement
- Provides formal recognition of completed learning activities
- Suitable for health & safety, compliance, leadership, and workplace training programmes

E-Learning Collaboration

NOS Certification Status

National Occupational Standards (NOS)

Through our Approved Partner Status, all Health & Safety courses are mapped against National Occupational Standards (NOS), making it simple for organisations and assessors to identify which NVQ criteria are covered within each course.

This unique accreditation provides significant value for businesses supporting employees who are working towards NVQ qualifications, helping to streamline assessment processes, reduce duplication of training evidence, and support faster qualification completion.

By selecting NOS certification for learners, organisations gain automatic access to an Accreditation of Prior Learning (APL) document containing the full course-to-NVQ mapping details.

The process is straightforward:

- Download the APL mapping document
- Provide it directly to the NVQ assessor
- The assessor can then identify and sign off the relevant criteria satisfied through successful completion of the eLearning course

This helps reduce assessment time, improve efficiency, and support cost savings across workforce development programmes.

What is NOS Certification?

NOS (National Occupational Standards) certification maps course learning outcomes directly against relevant NVQ performance and knowledge criteria.

This enables employees undertaking relevant NVQ qualifications to use successful course completion as supporting evidence towards achieving their qualification requirements.

NOS Certification Benefits

- Supports employees working towards NVQ qualifications
- Maps course content directly to National Occupational Standards
- Simplifies Accreditation of Prior Learning (APL) processes
- Helps reduce assessment and administration time
- Supports faster qualification achievement
- Provides recognised evidence of competency and learning
- Enhances workforce development and compliance tracking

E-Learning Collaboration

Thank You for Reading

Thank you for taking the time to explore this booklet on E-Learning. E-learning has transformed education by making knowledge accessible anytime and anywhere. Through digital platforms, learners can develop new skills, gain qualifications, and continue their education at their own pace.

Continue Your Learning Journey

- Explore online courses in subjects that interest you.
- Develop new digital and professional skills.
- Use trusted learning platforms and educational resources.
- Set learning goals and track your progress.

Acknowledgements

We would like to express our sincere thanks to Health and Safety Click for their long-term partnership and continued support in the development and improvement of the e-learning portal. Their commitment, expertise, and collaboration have played a key role in helping create an accessible and effective learning environment for users. We greatly appreciate their contribution and look forward to continuing this successful partnership in the future.

**Learning never stops
keep exploring, keep growing, and keep learning.**
